

eCampus: Promoting Technology Enhanced Learning at Styrian Universities

Andrea Meier, Anastasija Lyubova

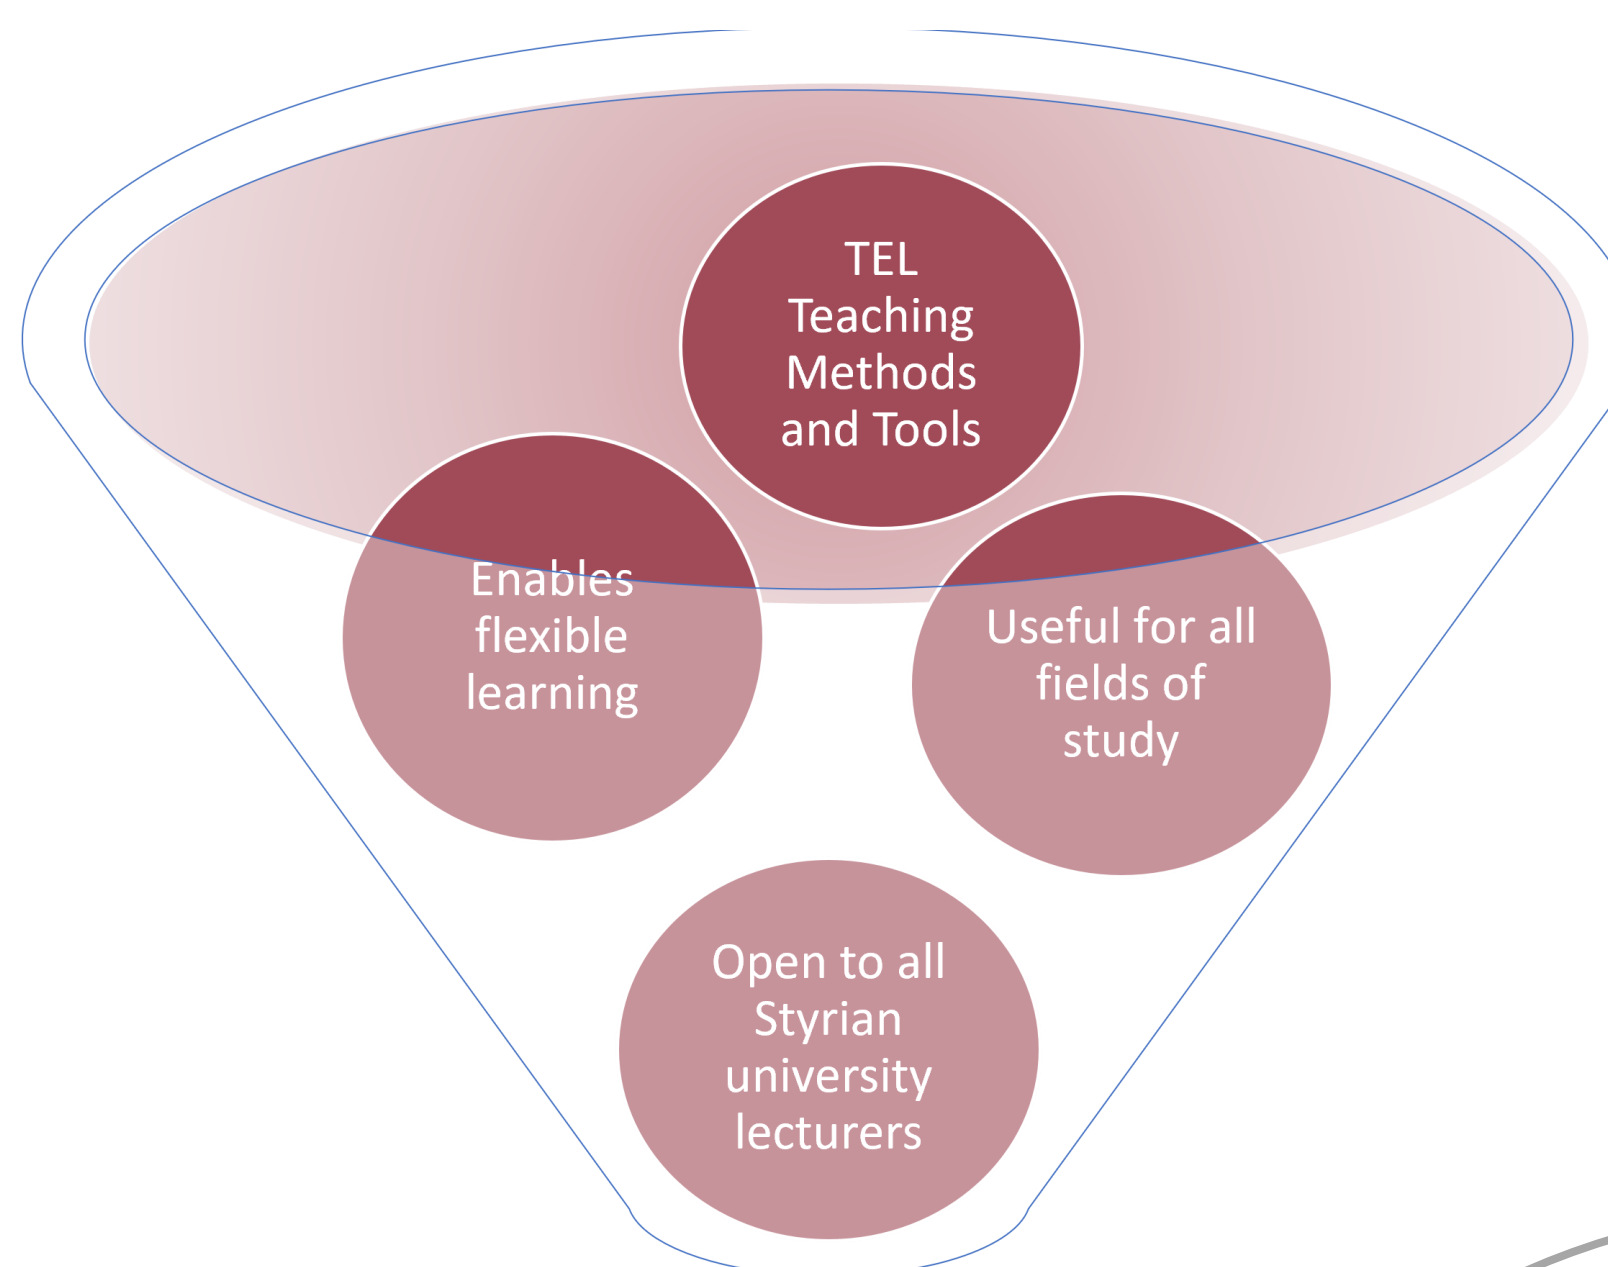

Centre for Teaching Excellence
FH CAMPUS 02 (University of Applied Sciences)

The background

- ⇒ Technology enhanced learning (TEL) is becoming all the more important in education
- ⇒ Skills and knowledge are needed but not all teaching staff have time and motivation to attend (week-)long workshops

The ideas

- ⇒ Platform for flexible online self-learning & contents that are applicable to different academic fields
- ⇒ General information on the implementation of TEL and practical examples
- ⇒ Creating an environment for interaction and communication
- ⇒ Focus on the acceptance of the online service

The project

- ⇒ Started by the Science Space Styria, consisting of nine universities in Styria (Austria)
- ⇒ Graz University of Technology, University of Graz and CAMPUS 02 University of Applied Sciences created the platform in the course of a two-year project
- ⇒ The other universities gave their input via task groups, providing insights and test persons
- ⇒ Completion in **April 2021**

Science Space Styria
Der Steirische Hochschulraum

51 use cases

= practical application guides

For example:

- Giving constructive feedback by means of digital tools
- Digital icebreakers
- Collectively compiling literature lists

Six categories

1. Course management
2. Creating learning materials
3. Conducting face-to-face teaching
4. Conducting online teaching
5. Assessment and feedback
6. Technology enhanced course concepts

Use this QR code for more details on the eCampus features!

Achievements since its launch in April 2021:

- **430 users** visited eCampus
- **1403 use cases** were viewed
- 2 online events held for the teaching staff:
 - an informational event in June 2021 with 120 registrations
 - a series of webinars on use cases from November 2021 to February 2022 with 10-30 participants (also from outside Styria) per webinar
- A competitor analysis shows that there is no other platform in German-speaking countries with the same features

Describe eCampus in a word!

What's next?

- Create new use cases → On which topics?
- Create opportunities for interaction → What would be interesting?
- Open the eCampus → How can this be achieved?
- How open should it be?

And what is your input?
