

We are looking for somebody to join our team as a

System Architect (w/m/d)

AT OUR SITE IN GRAZ

The **SSI Schaefer Group** is the world's leading solutions provider of modular warehouse and logistics systems and employs a workforce of over 8,600 people at its international subsidiaries and production sites.

SSI Schaefer consolidates the Group's software power, making it the ideal partner for analyzing, visualizing, and optimizing intralogistics processes.

With over **1,100 software experts**, we develop customer-oriented, individually tailored intralogistics solutions.

YOUR RESPONSIBILITIES

As a System Architect you will design and oversee the architecture of our software systems, focusing on the overarching user experience and the interaction of individual products within our portfolio.

- **Architectural Design:** You develop and maintain the overall software architecture of our software systems, ensuring alignment with our business goals and technical requirements.
- **Integration:** You design and implement integration strategies for seamless interactions between different products.
- **Stakeholder Collaboration:** You work closely with product managers, developers, and other stakeholders to turn requirements into architectural solutions.
- **Documentation:** You create and maintain comprehensive architectural documentation.
- **User Experience:** You collaborate with UX/UI designers to ensure a cohesive and intuitive user experience across all products.
- **Innovation:** You incorporate industry trends and technology trends into the architectural vision.

YOUR BENEFITS

In addition to a wide variety of engaging tasks, we also offer our employees the following benefits:

Family-owned company

Job security

Healthy growth

Home Office

Staff discounts

Numerous staff events

Comprehensive health care package

Lunch subsidy

Flexible working hours

Personal professional development program

Mentoring-System

Free parking

YOUR SKILLS

- Completed education with a focus on computer science, software engineering or a related field (university, university of applied sciences)
- Proven experience as a System Architect or similar role in a software development environment.
- Strong understanding of software architecture principles and design patterns.
- Experience with user experience design and product integration.
- Excellent problem-solving skills and attention to detail.
- Strong communication and collaboration skills.
- Proficiency in relevant programming languages and technologies.
- Very good knowledge of English and good German skills
